

## HONOLULU - BLACK FREESTANDING BIOETHANOL STOVE

BIO-20-325

Honolulu is a compact, freestanding bioethanol fireplace designed to resemble a classic wood-burning stove by ScandiFlames. Crafted from powder-coated steel with a sleek black finish, its small size makes it an ideal fit for traditional fireplace hearths and surrounds where the flue has been closed off. The fireplace features a 1.0-litre burner, providing up to 5 hours of burn time per filling, and a maximum heat output of approximately 1.6 kW. This output is typically sufficient to create a comfortable temperature in rooms measuring 15-20 square meters.

### TECHNICAL SPECIFICATIONS

---

#### Burner

Type of burner	Manual Burner
Minimum room size	45 m <sup>3</sup>
Flame length	13 cm
Requires electricity	No
Burn time	5 hours
Adjustable flame	Yes
Control	Manual
Usage	0.2 L/h
Heat output (max)	1,6 kW
Capacity	1 Litres
Fuel	Bioethanol
Flue/chimney	Not Required
