

NASHVILLE - BLACK FREESTANDING BIOETHANOL STOVE

BIO-20-327

Nashville is a medium-sized, freestanding bioethanol fireplace designed to resemble a classic wood-burning stove by ScandiFlames. Crafted from powder-coated steel with a sleek black finish, its size makes it an ideal fit inside a traditional fireplace hearth or fireplace surrounds where the flue has been closed off. The fireplace features a 1.5-litre burner, providing up to 6 hours of burn time per filling, and a maximum heat output of approximately 2 kW. This output is typically sufficient to create a comfortable temperature in rooms measuring 20-30 square meters.

TECHNICAL SPECIFICATIONS

Burner

Flue/chimney	Not Required
Type of burner	Manual Burner
Minimum room size	45 m ³
Burn time	6 hours
